Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

10/668,437

Applicant(s)

KAUTZKY ET AL.

Examiner

David D. Davis

Art Unit

2652

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on November 7, 2005.  
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-26 is/are pending in the application.  
4a) Of the above claim(s) 18-26 is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1-17 is/are rejected.  
7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☒ The specification is objected to by the Examiner.  
10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.  
5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 7-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin et al (US 2003/0189798). As per claims 1, 2 and 11, Lin et al discloses in section [0004] and [0008] a magnetic sensor 204 including a sensor stack 208; and an arrangement for providing an electric field to produce an electrical dimension or electrical read width of the sensor stack 208, which is smaller than a corresponding physical dimension of the sensor stack 208. As per claims 3, 7 and 12-15, Lin et al shows in figure 7 the arrangement for providing an electric field includes at least two bias electrodes 262 & 280, which are biased with voltages of opposite polarity, disposed on opposing sides of the sensor stack 208 such that an electrical width of the sensor stack 208 is a function of a bias voltage applied to the two bias electrodes 262 & 280.

As per claims 8 and 10, Lin et al also shows in figure 7 the arrangement for providing an electric field including a bias electrode 262 & 280 disposed on a side of the sensor stack 208. Inherent in Lin et al is that an electrical width or an electrical strip height of the sensor stack 208 is a function of a voltage of the bias electrode. As per claim 9, Lin et al shows in figure 7 that the electrical dimension is electrical stripe height.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 4-6 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin et al (US 2003/0189798). Lin et al discloses the claimed invention. However, Lin et al is silent as to the two bias electrodes being biased with positive or negative DC bias voltages or an AC bias voltage. Lin et al is also silent as to the magnetoresistive stack being a tunneling magnetoresistive stack.

Official notice is taken of the fact that two bias electrodes biased with positive or negative DC bias voltages or an AC bias voltage and the magnetoresistive stack being a tunneling magnetoresistive stack is notoriously old and well known in the magnetic head art.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide the bias electrodes with positive or negative DC bias voltages or

Art Unit: 2652

an AC bias voltage as taught in the art. The rationale is as follows: one of ordinary skill in the art at the time the invention was made would have been motivated to provide different types of bias voltages to provide flexibility in when biasing the magnetic head.

It also would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide a magnetoresistive stack in a magnetic head with a tunneling magnetoresistive stack as taught in the art. The rationale is as follows: one of ordinary skill in the art at the time the invention was made would have been motivated to a magnetoresistive stack with a tunneling magnetoresistive stack so as to be able to read higher density magnetic disks.

### ***Response to Arguments***

6. Applicant's arguments filed November 7, 2005 have been fully considered but they are not persuasive. Applicant assert on page 8 in the first full paragraph the following:

GMR read head 200 is designed such that the physical read width is identical to the electrical read width. Thus, the electrical read width remains constant since the physical dimensions of GMR read head 200 cannot change.

The claims do not require a "changing" or "adjusting" read width. The claims require an "electrical dimension of the sensor stack which is smaller than a corresponding physical dimension". Looking at figure 7, for example, of Lin the "electrical dimension" of the sensor stack 212 is smaller than the "physical dimension" of the sensor stack 204, as required by the claims.

### ***Conclusion***

Art Unit: 2652

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

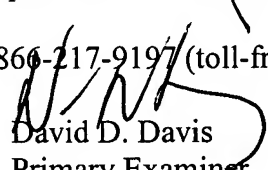

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Davis whose telephone number is 571-272-7572. The examiner can normally be reached on Monday thru Friday between 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, A. L. Wellington can be reached on 571-272-4483. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
